SITUATION SUMMARY

National News – Significant Events

Two Shot at Manhattan Federal Building

(Washington Post) Two people were reportedly shot – one fatally - at a federal building in Manhattan on Friday evening. A New York Police Department spokesman confirmed shortly before 6 p.m. that there was an “active shooting situation” and that one person had died at Varick and Houston streets, but no further details were immediately released. Josh Sternberg, a content strategist at The Washington Post, reported that plainclothes officers in bulletproof vests were directing traffic near the scene. Ambulances were dispatched and helicopters were seen flying low overhead. CBS New York reported that a man who walked into the building at 5.19 p.m. shot and wounded a security officer before taking his own life. The security guard was taken to Bellevue Hospital Center, according to the report. The incident took place at 201 Varick St., which houses an immigration court and a U.S. post office.

International News – Significant Events

France Train Shooting: US ‘Heroes’

(BBC) Three American men are being hailed as heroes for overpowering a heavily-armed gunman on a train in northern France. The incident happened on the high-speed Thalys service near Arras, and the attacker was arrested at Arras station. US President Barack Obama praised the passengers, who included two off-duty US military personnel. The man arrested was a 26-year-old Moroccan. Anti-terrorist officers have taken over the case. The gunman's weapons were said to include a Kalashnikov, a knife, an automatic pistol and cartridges. French authorities said three people were injured, two of them seriously - one with a gunshot wound, the other a knife wound. Interior Minister Bernard Cazeneuve said the attack took place at 17:45 local time (15:45 GMT) on Friday. French media said the arrested man was known to the intelligence services but he has so far refused to talk to police in Arras. Two of the American men who overpowered the gunman, Spencer Stone and Alek Skarlatos, are members of the Air Force and the National Guard respectively. Their friend, Anthony Sadler, was travelling with them and described the scene. "As he was cocking it to shoot it, Alek just yells, 'Spencer, go!' And Spencer runs down the aisle." "Spencer makes first contact, he tackles the guy, Alek wrestles the gun away from him, and the gunman pulls out a box cutter and slices Spencer a few times. And the three of us beat him until he was unconscious. Chris Norman, a British man living in France, was also hurt while trying to subdue the attacker. "The American men and Mr. Norman were awarded medals for bravery by authorities in Arras. Mr. Cazeneuve said the passengers were "particularly courageous and showed great bravery in very difficult circumstances", adding: "Without their composure we could have been confronted with a terrible incident." "The president expressed his profound gratitude for the courage and quick thinking of several passengers, including US service members, who selflessly subdued the attacker," the White House said in a statement. "It is clear that their heroic actions may have prevented a far worse tragedy."

SITUATION SUMMARY

Strong Petroleum Odor/Sheen, Summerland, Santa Barbara County, SPILL 15-4883

On 08/20/15 at 1259 hours, Santa Barbara County Environmental Health advised of a strong petroleum odor and sheen at Summerland Beach located near Lookout Point. The beach extends eastward towards Loon Point. Source of release was unknown and samples were collected to be analyzed.

UPDATE 08/21/15: As a result of Spill Report 15-4883, the United States Coast Guard (USCG) responded to the release. They sampled the oil in the water and sent it off for analysis. During their investigation, USCG determined that though the release is more than expected for typical natural seepage, there are no other land-based oil or pipeline issues in the area which could account for the release. Therefore, they still believe that the release is a result of natural seepage, but that a contributing factor could be the fact that the offshore platforms were all shut down during the Refugio incident, and increased pressure in their lines and resulting seepage could be responsible for some portion of the oil found in the water and at Summerland Beach.

On 08/21/15, Cal OES was advised that Santa Barbara County Public Health Department issued Press Releases for the Closure and Warning for Summerland Beach as follows:

- Summerland Beach is closed to the public to prevent adverse health effects and protect the public's health. The decision to close the beach at this time was due to the volume of oil on the beach and sand, the nature of the oil (more liquid and mixed in the water and across sand as opposed to solid tar balls which are more easily avoidable) and intermittent strong petroleum odors at a level that may cause health effects.
- Summerland Beach will continue to be monitored by various County agencies including Public Health, Parks, and Air Pollution Control District. Monitoring of air, land and ocean conditions will continue.
- The cause of the oily substance at Summerland Beach is not yet clear.
- This is not believed to be directly related to the Refugio 901 incident.
- Further testing and analysis will continue over the next few weeks. In the interim, we strongly advise the public to be observant of conditions at the beach and avoid close proximity to the beach when there is a strong odor and/or large amounts of an oily substance present.

There are no requests for assistance or unmet needs.

The California State Warning Center conducted all appropriate notifications, including but not limited to local government agencies.

Cal OES Duty Officers are monitoring the situation and will provide updates as they become available.

Active Weather Warnings, Watches and Advisories by County:

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Little change in the weather is expected as high pressure builds aloft so interior areas may see an increase in higher temps this weekend, but that could be mitigated by smoke cover. No precipitation is expected and a more stable airmass will prevent any thunderstorm activity from occurring. Some light offshore flow will likely bring some sunshine to the coastal zones today and Sunday but this may be offset by smoke. On Monday the ridge aloft weakens and allows a little more southwest flow to strengthen aloft leading to perhaps a little help in smoke clearing leading into Tuesday. Uncertainty continues in the long range forecast as models play hot potato with their depiction of an approaching trough from the Pacific Northwest.

Medford Weather:

The air mass is expected to remain stable under building high pressure this weekend. Then for the afternoon and evening hours of Monday and Tuesday, very weak instability with little moisture develops over the higher terrain of Oregon. This instability and available moisture will be highest over northern Klamath County with only a slight chance of precipitation and a few thunderstorms.

Reno Weather:

Hazy skies today are likely to decrease Sunday, except for southern Mono and Mineral counties where haze and smoke could persist this weekend. Lighter winds are expected today, with typical afternoon zephyr breezes returning Sunday and continuing through much of the upcoming week. Temperatures will remain a few degrees above average with slight cooling possible late in the week.

San Francisco Weather:

Low clouds will clear to the coast by midday with sunny/clear skies expected across the region. Light onshore flow will persist through this morning with slightly stronger winds expected through the afternoon and evening hours. A ridge of high pressure situated over the desert southwest will persist much of the week bringing continued sunny and clear conditions.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Upper level ridging will build some today with high temperatures a couple of degrees warmer than Friday, reaching the 90s for the valley. A gradual warmup continues into Tuesday as the ridge builds some more. High temperatures will remain around normal temperatures levels through the weekend into Monday, then reach a couple of degrees above normal on Tuesday.

Hanford Weather:

Dry weather can be expected over the area for the next several days. Temperatures will remain near to slightly above normal as the upper-level ridge slowly strengthens through the weekend into next week.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

High pressure will build into the Four Corners region over the weekend into early next week. As a result morning low clouds will become confined to the coastal plain with a gradual warming trend. A more significant heat event is expected later in the week which could lead to some record heat.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

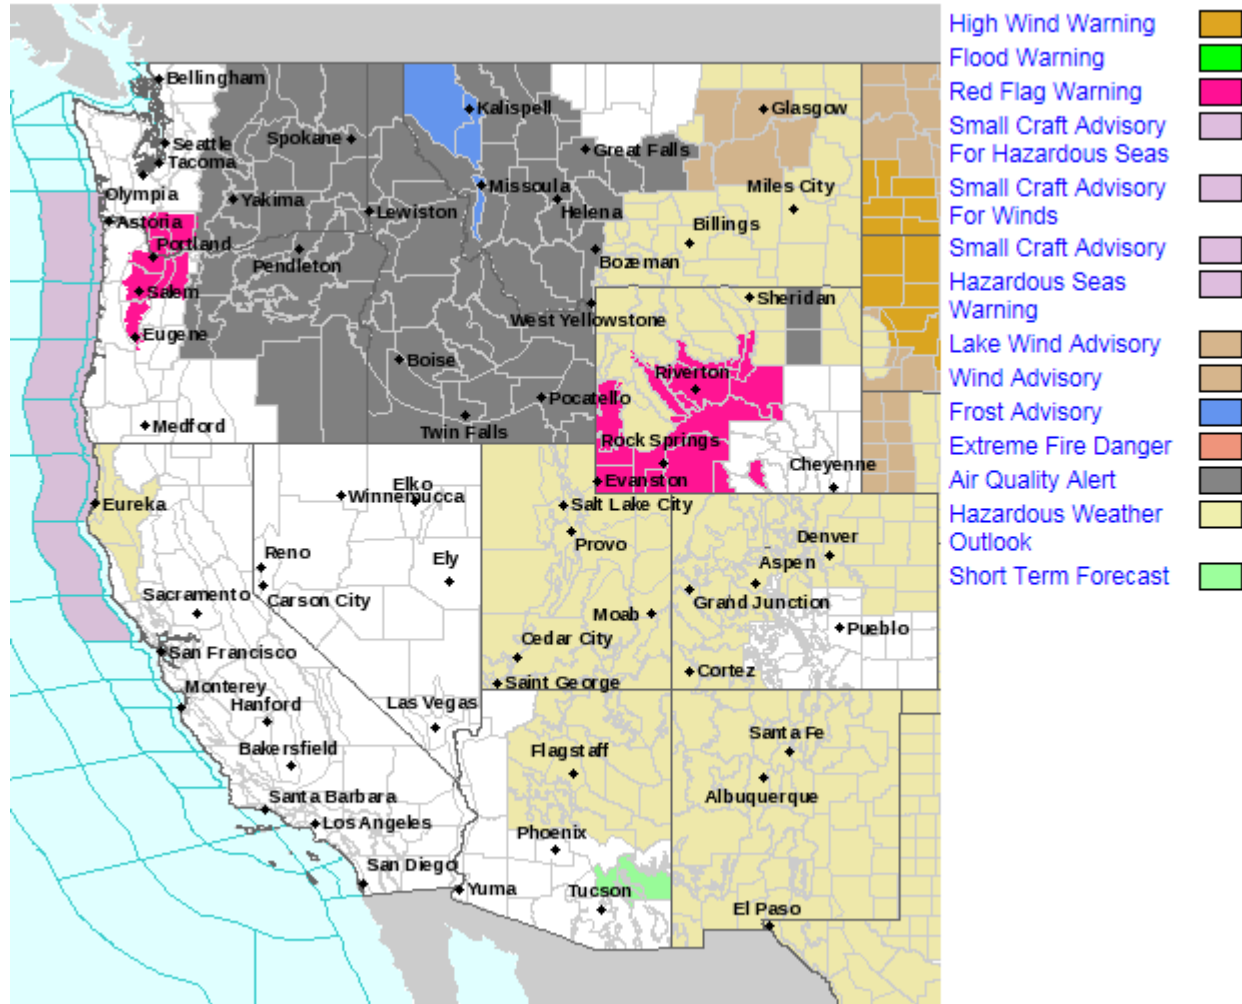

High pressure to the east will strengthen bringing a slow warming trend through the end of next week with the marine layer becoming gradually shallower. On Tuesday and Wednesday, southern California will be on the western fringe of monsoonal moisture with a slight chance of afternoon and early evening thunderstorms in the mountains and deserts.

Southeast California Weather:

Hazy conditions over much of the area will improve over the weekend as smoke from California wildfires is steered toward central Nevada. A shallow push of moisture will lead to slight chances for thunderstorms over mainly the higher terrain of portions of Arizona this weekend. Deeper moisture arrives early next week and could linger through mid-week which will result in increasing coverage of showers and thunderstorms.

Start Time: 07/31/15 at 1933 hours

Per Cal OES, CAL FIRE, and ICS-209 as of [08/22/15 at 0531 hours](#):

- [47,079 Acres](#), 3% Contained

Evacuations/Shelters:

- Mandatory Evacuation Areas:
 - The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
 - There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
 - There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
 - Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: Fresno County EOC is activated at Level 2 from 0700-1900 hours
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.
